

INFORMATION ON NEW CONTRIBUTIONS OF THE DISSERTATION

- Postgraduate: Le Chinh Truc
 - Theme: Spatial planning of TOD in Hanoi's central urban area.
 - Major: Regional and Urban Planning, Code: 9580105

 - Instructor: 1. Associate Prof. Dr. Che Đình Hoang
2. Dr. Arch. Nguyen Thi Lan Phuong

 - Education institution: Hanoi Architectural University
-

The dissertation has delivered new contributions as follows:

1. Determine and systemize theoretical TOD concepts. Propose new concepts of TOD based on actual conditions of Hanoi and Vietnam; propose solutions for the City's TOD.

2. Define principles, criteria to determine TOD network's allocation, location, category, range and features suitable for Hanoi.

3. Propose space arrangement, criteria for TOD at each urban area: Historical central urban, new urban, Hanoi's central urban areas; suitable for natural, socio economic, environmental landscape and legal conditions. Prepare urban design guidelines for TOD areas.

4. Propose managerial principles for surface & sub - surface spaces; connection between existing urban and new TOD urban areas.

5. Propose conversion solutions from traditional urban model to TOD model; from traditional neighborhoods to TOD neighborhoods.
