NEW CONTRIBUTION OF THE DISSERTATION**

Dissertation title: **Integrating traditional culture into the spatial organization of urban park in Bac Ninh (Application for urban park in Tay Bac urban area)**

Specialization in : Regional and Urban planning
Code : 62.58.01.05
PhD Candidate : Nguyen Thi Dieu Huong
Supervisor : Professor. Dr. Arch. Do Hau
Training institutions : Hanoi Architectural University

1. The thesis has identified traditional cultural elements (including physical and intangible elements) of Bac Ninh, selected characteristic and appropriate elements to integrate into the park space.
2. The thesis proposes a general model of park structure and 3 models of nuclear structure developed from the general model:
 - Centralized nuclei structure
 - Independent dispersed nuclear structure
 - Nuclear structure intertwined

In the model of park structure, traditional cultural elements are identified as important components, the central nucleus of functional areas in the park.

3. The thesis proposes solutions to exploit traditional cultural elements in the organization of park space in Bac Ninh: including: functional subdivision; organizing park space; technical infrastructure and solutions for organizing, managing and exploiting parks.
